2023 LIGHTING AWARDS

IESANZ SA/NT CHAPTER 2022 LIGHTING AWARDS

The aim of The Lighting Society is the advancement of the art and science of illumination and the circulation of knowledge to all interested parties.

The IES Australia and New Zealand Lighting Awards program provides a unique opportunity for public and industry recognition of professionalism, ingenuity, innovation and originality in lighting design and implementation.

This program is not a competition, but rather highlights excellence in lighting.

FRANGIPANI HOUSE

ARCHITECTS INK & INSIGHT LIGHTING SOLUTIONS

The lighting design masterfully blends with the home's architecture, achieving a harmonious balance that complements the spaces without overpowering them. The judges were particularly impressed by the thoughtful integration of natural light and light shafts, which add dynamic ambiance throughout the day.

The scale of the lighting fixtures perfectly complements the proportions of the space, discreetly highlighting the homeowner's carefully curated collection of objects. The design team faced a unique challenge in the form of a shallow 30mm deep ceiling void, making their achievement even more remarkable.

OVINGHAM LEVEL CROSSING REMOVAL

PTP ALLIANCE, MOTT MACDONALD, ARUP, COX ARCHITECTURE & ASPECT STUDIOS

The carefully planned lighting design has not only transformed the space but has also played a crucial role in enhancing the surrounding urban setting. The warm, inviting ambiance generated by the lighting extends outwards, creating a sense of connection and inviting passers-by to experience this public realm, all whilst evoking a feeling of safety.

This project demonstrates the power of lighting design to transform what could be underutilized spaces into vibrant, engaging, and welcoming areas that enrich the urban environment and foster community connection.

VAILO ZENITH GEN V SPORTS LUMINAIRE

VAILO

The Zenith Gen 5 Sports Luminaire stands as a testament to the power of innovation, meticulous design and local manufacture. Its compact size facilitates seamless retrofitting into existing lighting systems, minimizing disruptions and maximizing cost-effectiveness. This thoughtful design choice demonstrates a profound understanding of the practical needs of sporting facilities and their managers.

The luminaire's concealed cable reticulation not only enhances its aesthetic appeal but also safeguards it against bird-related damage, ensuring long-lasting performance.

KINGSWOOD OVAL

VAILO

This retrofit upgrade stands as a beacon of innovation, transforming the once outdated and inefficient lighting fixtures into a modern, energy-efficient LED system. Executed within a remarkable five-day timeframe and under budget, the project's impact extends beyond mere recreation, fostering a safer and more inviting space for community engagement and social interaction.

The revitalized Kingswood Oval now extends its welcoming arms to the community, offering opportunities for night time sports activities while achieving great uniformity and visual comfort.

SIR DOUGLAS MAWSON LAKE

CITY OF SALISBURY & BUCKFORD ILLUMINATION GROUP

This upgrade successfully replaced HID lamps with energy efficient LED lights resulting in significant savings in maintenance costs and a lower carbon footprint.

The project was praised by the judges for its innovative approach, positive impact on the community and consideration for wildlife with the use of PC Amber LED chips.

A comfortable level of illumination is achieved throughout the pathways and carpark which makes the area much more inviting to people of all ages.

83 PIRIE STREET ENTRY FOYER

BESTEC, WOODS BAGOT, INSIGHT LIGHTING SOLUTIONS

A wide variety of lighting techniques have been used to create a welcoming, inviting, and sophisticated space.

Plants are bathed in the glow of cool-coloured LEDs, encouraging healthy growth and the majority of the space is illuminated with soft, indirect light emanating from feature boxes. This subtle lighting approach avoids harsh glare and accentuates the architectural details.

The softly diffused light box ceiling acts as a beacon, gently drawing users towards an area that might otherwise feel dimly lit and encourages them to interact with the various spaces.

LUMA RESTAURANT AND BAR

HACHEM

Luma wins an award of excellence for its innovative and immersive design. The restaurant and bar's lighting scheme is described as "brave, bold, and unique," pushing the boundaries of traditional lighting design. The lighting works as a sculptural art piece, consistent with the building and branding of the Sebel hotel, transforming the venue into a truly immersive experience for guests.

The effect is both soft and elegant, artistic and immersive, creating a luxurious and inviting space for guests to enjoy.

It simply is a work of art that sets a new standard for restaurant and bar lighting.

WCH SUSTAINMENT UPGRADE

LUCID CONSULTING AUSTRALIA & VERSALUX

The special care baby unit caters to patients who demand specialized treatment sometimes lasting months or even longer.

The unit is illuminated with the Versalux MelaGen system, an embodiment of innovation that harnesses cutting-edge LED technology, meticulously researched and developed to achieve remarkable enhancements in the well-being of visitors, staff, and patients alike. This system goes beyond the traditional tunable white approach, which merely alters the color temperature of LEDs. Instead, it precisely modulates the intensity of blue-enriched light throughout the day, mimicking the natural rhythm of circadian lighting.

The client deserves recognition for embracing this innovative technology and it sets a commendable precedent for future healthcare projects.

WSP ADELAIDE OFFICE FITOUT

WSP, JPE DESIGN STUDIO & INSIGHT LIGHTING SOLUTIONS

The new WSP Adelaide office fitout wins an award of excellence for its outstanding lighting design on a limited budget. The design team carefully selected and detailed the fixtures to create a variety of effects, including seamless transitions between different areas of the office. Despite the budget constraints, the team was able to create a highly effective and visually appealing lighting scheme.

The different areas of the office have their own unique lighting schemes, tailored to their specific functions and needs. The lighting throughout the office is united by a common design aesthetic, creating a sense of harmony and balance.
