Illuminating Engineering Society of Australia and New Zealand Ltd

IES AWARDS AND MEMORIALS OTHER THAN LIGHTING AWARDS

INTRODUCTION

This document gathers together into one consolidated document descriptions about, and Rules for all of the various IES Awards and Memorials (other than lighting awards) that have been established. This includes those created by the previous five Australian Regional Societies together with the previous New Zealand Society, prior to the establishment of the single entity Illuminating Engineering Society of Australia and New Zealand (IES The Lighting Society), on 1st July 2001. These Awards are now referred to as Chapter Awards.

In addition, the recently formed IESANZ Ltd Board has created a new award, the President's Citation Award, which was introduced in year 2004. The Board has also assumed responsibility for the previous IES National Council's, and more recently the former IESANZ Central Council's, Ernest Freedman Memorial Award that is now incorporated into the Bylaws of the new Society.

Each of the Chapters has provided information about their respective awards and memorials and this has enabled this consolidated document to be prepared. In a few instances, recent Chapter Management Committee members, have been unaware of the origin of an award and recourse has been made to the vitally important historical document "*The Illuminating Engineering Societies of Australia - National Council - 1946-1976*" prepared by the late Ernest Freedman, to provide the essential background historical information to understanding why these awards were made in the first instance.

It is hoped that this document will provide the necessary information to enable the regular continuation of these now quite historical IES awards, and in some instances also inform newcomers to the Society about the background to their illustrious forbears who established the IES Regional Societies and the early Chapters and created the basis for the professional reputation this Society has today.

SOCIETY AWARDS

PRESIDENT'S CITATION AWARD:

This Award was instigated by the IESANZ Board following a report proposal by Richard Ponting, a Board member representing New Zealand, on 13th April 2004. He wrote "It is a legitimate part of any Society wishing to recognize a particular service or excellence. It will only work to its full potential however when the justification for the award is sound and full recognition is made in Society Journals (*Lighting* and IES web site). It should be appreciated that the award need not be made every year. The programme does not require a high level of management input and could largely be conducted electronically until the award ceremony that might coincide with a Presidential visit to the Chapter of the member concerned, or at a Convention."

Award Rules:

1. The award is not made on application but is made at the discretion of the President, who may seek advice on the matter from the Board and Chapter Presidents, to a member for outstanding technical expertise and/or service to the Society during any one particular year. [Note: Provision already exists for the award of special membership grades for acknowledging continuous high service.]
2. A typical recipient might be:
 - The organizer of a highly successful Convention
 - The designer of a landmark installation
 - The author of an outstanding technical paper
3. The recipient may already hold honoured positions such as FIES or Honorary grades.
4. The award will consist of a framed certificate of Citation.

Recipients:

2004: Neil Midolo

For service as a foundation member of the Board and especially for his work as Society Treasurer.

2006: Trevor Stork

For service as co-opted member of the Board, and President, and for his contribution to lighting education in Victoria.

2007: Dr Warren Julian:

For services to the Society as Editor of the Society's magazine, "LIGHTING" and as a member of the Society's Status & Qualifications Committee for many years.

ERNEST FREEDMAN MEMORIAL AWARD:

After being General Secretary and official historian of the Society for many years the then IES Australia National Council decided to honour his memory by funding specially invited speakers at Conventions to present a lecture in his name. Ernest Freedman authored: "*The Illuminating Engineering Societies of Australia: National Council – 1946-1976*". This comprised over 250 type-written pages and appendices of data describing the foundation of the Regional Societies leading to the creation of a federated body in Australia known as the IES National Council. He also wrote a large unpublished and only partly edited tome of over 300 pages on the history of the NSW Society. The Rules for this award were incorporated in the Bylaws of the new

Awards Other Than Lighting

Illuminating Engineering Society of Australia and New Zealand Ltd when this commenced on 1st July 2001.

Mick Trounson (Victoria) advised that the late Jim Lowson (Victoria) was the first recipient of this award and that it was a trophy in the form of a glass prism, but no-one knows where it is located at this time. Subsequently, the IES NSW Society decided to adopt the same rules. However, when the single entity Society was formed the Board-elect decided on the following Award Rules which followed the previous IES Central Council rules:

Award Rules:

1. As part of its function, the Society's Convention Committee shall administer the E.L. Freedman Memorial Fund and recommend to the Board the amount of monies to be offered to the Chapter hosting the Convention for the E.L. Freedman keynote speaker(s) at the Society Convention.
2. The IES Board may offer a sum of money from the general revenue to the host Chapter to obtain keynote speakers for the Society's Convention from overseas or interstate who might not otherwise be available.
3. The E.L. Freedman speaker shall be an eminent person in the art and science of illumination or in some related area as determined by the respective Chapter. The E.L. Freedman speaker shall be required to submit a written paper for publication in IES journals.
4. The host Chapter shall be responsible for inviting one or more speakers to present the E.L. Freedman keynote address(s). The address shall include a short reference to E.L. Freedman.

KLAUS ENGELHARD MEMORIAL SCHOLARSHIP

Award Rules:

1. **Purpose:** To provide a scholarship that will pay the tuition fees for a student to undertake the lighting course at either the University of Sydney, RMIT in Melbourne or Queensland University of Technology in Brisbane and, on completion, to visit the OSRAM headquarters in Germany. Lighting Council Australia, OSRAM Australia and the Illuminating Engineering Society of Australia and New Zealand (IES: The Lighting Society) provide the scholarship to encourage the study of lighting design and as a memorial to Klaus Engelhard, one of the first students to undertake lighting design studies at the University of Sydney. Klaus Engelhard's studies were important in his becoming Managing Director of OSRAM Australia.
2. **Value:** The value of the scholarship is sufficient to meet the fees charged for the completion of the GradCertDesSc (Illumination) plus the unit 'Lighting Design' at University of Sydney or the Graduate Certificate in Lighting plus one unit 'Lighting Applications' at Queensland University of Technology or the Graduate Certificate program component of Cert IV Electrical Engineering at RMIT. Note that ongoing funding of the scholarship is dependent on successful completion of progressive course requirements.

On completion of the requirements for the award at either of the three University courses, OSRAM Australia will supply a return trip to Germany to visit the OSRAM facilities. The travel component to the OSRAM factories will be arranged between the student and OSRAM.

Awards Other Than Lighting

3. **Selection:** the scholarship will be awarded on the basis of written applications. Applicants should submit their reasons for wanting to study lighting design providing whatever evidence of prior interest, experience and preparation they wish. Applications will be considered by a panel comprising two representatives from IES: The Lighting Society, one from OSRAM Australia and two from Lighting Council Australia. Shortlisted applicants will be required to attend an interview.

NEW SOUTH WALES CHAPTER AWARDS

A P TURNBULL AWARD:

From the late Ernest Freedman's document "*The Illuminating Engineering Societies of Australia - National Council - 1946-1976*" we find the following description of the AP Turnbull Award:

"In 1955 - we quote from the "history of the New South Wales Society" (Freedman writes) - "the first President of the Society, now an Honorary member, Mr AP Turnbull, accepted yet another honour: an award to be named after him and made to that member who, during the current year, most conspicuously advanced the aims and objects of the Society, to be known as the AP Turnbull Award. It consisted of a suitably engraved silver cigar box, presented to the Society by an anonymous donor. The recipient of the award was to be selected by the members of the Executive and Finance Committee, chaired by the President."

"The first AP Turnbull Award was won by W Allen Smith for his work in connection with the IES Exhibition and for his untiring efforts in presenting the IES School Lecture on many occasions. It was sad indeed to hear shortly afterwards of the passing of Mr Turnbull on December 12th, 1955, at the age of eighty years."

The AP Turnbull Award, with but few exceptions, has since been awarded each year. The box, presented . . ., and inscribed with the recipient's name over the President's facsimile signature, is presented at the Annual Dinner of the NSW Chapter, combining a fitting and lasting tribute to its first President with recognition for those who followed."

Award Rules:

1. This award is to be made to the member who, during the current year, most conspicuously advanced the aims and objects of the Society.
2. The recipient of the award is to be selected by the members of the NSW Chapter Executive Committee, chaired by the Chapter President.
3. The award consists of a suitably engraved silver cigar box, inscribed with the recipient's name over the Chapter President's facsimile signature, and presented at the Chapter Annual Dinner of the Chapter.

Recipients:

1955: W Allen Smith: Inaugural Award.

For his work in connection with the IES Exhibition and for his untiring efforts in presenting the IES School Lecture on many occasions.

RICHARD (DICK) CHAPPELL MEMORIAL AWARD:

This perpetual award is in recognition and honour of the distinguished career and life's work of the highly respected lighting designer, friend and colleague to many members of the New South Wales Chapter, Richard (Dick) Chappell, who died in August 2002 after a short illness.

Amongst many professional achievements, Dick Chappell was appointed as the principal lighting designer of the Sydney Opera House, which became the inspiration for the award.

Awards Other Than Lighting

Award Rules:

1. This occasional award is to be made to a member who has earned recognition from their peers over many years for their contribution to the lighting profession. The citation to read: "In recognition of exceptional contribution to the lighting profession throughout a long and distinguished career."
2. The recipient of the award is to be selected by the members of the NSW Chapter Executive Committee, chaired by the Chapter President.
3. The award shall consist of a ceramic replica of the Sydney Opera House suitably mounted in a specially fabricated presentation case.
4. The award, inscribed with the recipient's name, is to be presented at the Chapter Annual Dinner of the NSW Chapter.

Recipients:

2004: Barry Webb: Inaugural Award.

For his outstanding contribution to Australian Lighting Design over a long and very distinguished career

2005: Helmut Paidasch:

For his significant contribution to the Industry and the Society over a distinguished career. Sadly Helmut passed away in December of the same year

2006: Dr Alec Fisher:

For his outstanding work in producing the Australian and New Zealand Lighting Standards

2007: Dr Warren Julian:

For his long and distinguished career in Lighting Education in Australia and the Asia Pacific region.

IES: THE LIGHTING SOCIETY AWARD - UNIVERSITY OF SYDNEY:

This award is made by the Society in association with University of Sydney to the student with the best performance in core subjects in the Illumination Design Programme at the University.

The same award is presented twice in each year to the same student at separate ceremonies, initially at the University of Sydney Post Graduate Awards Ceremony in May, and then again at the Annual NSW Chapter Awards Dinner later in that same year.

The Chapter President shall arrange with the Society Secretariat for a complimentary Society membership to be processed and a letter confirming the membership shall be presented with the certificate to the award recipient.

Awards Rules:

1. This award is to be made to the student with the best performance in core subjects, in the Illumination Design Programme at the University of Sydney.
2. The recipient of the award shall be selected by the incumbent Principal Lecturer of the University Illumination Design Programme.
3. At the first presentation, at the University of Sydney Postgraduate Awards Ceremony in May, the University invites the current President of the NSW Chapter to present a certificate prepared for the University as the IES: The Lighting Society Award.

Awards Other Than Lighting

4. At the University function, the Chapter President shall also give a formal complementary invitation to the recipient and a partner to attend the Annual NSW Chapter Lighting Awards Dinner.
5. At the Annual NSW Chapter Awards Dinner later in that same year, a second similarly worded IES framed certificate shall be presented to the same recipient.
6. The award recipient also receives a one year complimentary Associate membership of the Society.

IES: THE LIGHTING SOCIETY AWARD - SYDNEY INSTITUTE OF TECHNOLOGY:

This award is presented to the student who has achieved the best performance in the Principles of Lighting Course at the Institute. It is presented to the student at the Annual NSW Chapter Awards Dinner. The recipient is selected by the incumbent Principal Lecturer of the Principles of Lighting Course.

The Chapter Executive Committee shall be advised of the recipient's identity and the Chapter President shall then formally invite, with the compliments of the Society, the recipient and a partner to attend the Annual Chapter Dinner, where the recipient will be publicly acknowledged and presented with a certificate prepared by the Society. It has been customary to invite the Principal Lecturer at the Institute to present this certificate on behalf of the Society.

Award Rules:

1. This award is to be made to the student with the best performance in the Principles of Lighting Course at Sydney Institute of Technology.
2. The recipient of the award shall be selected by the incumbent Principal Lecturer of the Principles of Lighting Course.
3. The award consists of a complementary invitation to the recipient and a partner to attend the Annual NSW Chapter Awards Dinner, where the recipient shall be publicly acknowledged and receives a framed certificate of achievement from the Society.

OTHER HONOURED PAST MEMBERS:

H G FALLON:

According to Ernest Freedman in his "*The Illuminating Engineering Societies of Australia - National Council - 1946-1976*", Freedman donated to the Society in New South Wales "a library cabinet to be inscribed 'The H G Fallon - IES - Library', to acknowledge the wonderful service which Mr Hal Fallon had given to the IES from its foundation to this date (ie December 1963)." The cabinet has been in the care of the custodian of records of the former IES National Council and contained the entire archival files of the National Council and the IES Society of New South Wales. The cabinet was located in February 2007 at the rear of a 4TH floor teaching classroom in the Wilkinson Building, Department of Architectural and Design Science, at the University of Sydney under the care of Associate Professor Dr Warren Julian.

O G HUXLEY:

According to Ernest Freedman in his "*The Illuminating Engineering Societies of Australia - National Council - 1946-1976*", the NSW Council in 1972, decided to honour O G Huxley. "Fellow, Founder Member and Past-President of the

Awards Other Than Lighting

Newcastle Chapter, by awarding a book to the most successful candidate in the lighting course held at the Newcastle Technical College, the award to be known as "The Otto Huxley Award".

QUEENSLAND CHAPTER AWARDS

THE STAN BURRAGE AWARD

Stan Burrage joined the IES Hobart Chapter in 1950. On moving to Brisbane in 1971 Stan became an active member of the Queensland Chapter and held almost every committee position in the Chapter, including President. He was also National President of the IES from 1981 to 1985. Along with John Saunders, Stan helped establish the Certificate Lighting Course which commenced at South Brisbane TAFE in the late 1970's. Stan was to teach this course for 25 years. Stan's professional interest was in road lighting. He had two lighting books on this topic published and presented numerous papers at IES conferences. He also served on several Standards committees. Stan was made a Life Fellow of the Society in recognition of the significant contribution he made to lighting on a national scale.

The Stan Burrage Award is presented to the student who obtains the best overall marks in the Graduate **Certificate in Lighting** Course (PH62) in the Queensland University of Technology Post-Graduate Lighting Program.

THE JOHN SAUNDERS AWARD

John Saunders involvement with the IESANZ began in 1956 on becoming an Associate Member. He served on State Council of the IES from the early 1960's until the mid 1980's. He was Queensland State IES President in 1973, and also served as Treasurer for a number of years. He was convenor of the Queensland Meritorious Lighting Awards in the late 1960's and early 1970's. In the late 1970's and early 1980's he became Chairman of an IES committee that was instrumental in establishing a lighting course with the Dept of Education which allowed successful graduates with the appropriate practical experience to become full members of the IES. He also served on many standard Committees. He was appointed an Hon Fellow of the IES in October 1998 in recognition of his services to the IES in Queensland and lighting generally.

The John Saunders Award is presented to the student who obtains the best overall marks in Graduate **Diploma in Lighting** Course (PH72) in the Queensland University of Technology Post-Graduate Lighting Program.

TAFE AWARD:

This award was discontinued when the South Brisbane College of TAFE discontinued teaching the IES lighting course.

SOUTH AUSTRALIA CHAPTER AWARDS

PROFESSOR SIR KERR GRANT AWARD:

This award honours the memory of Professor Kerr Grant, later knighted, and who, as Professor of Physics at the University of Adelaide, South Australia, was elected Foundation President of the Illuminating Engineering Society of South Australia on 27 February 1940. Subsequently he was President for a further three years and stayed on as a Regional Council member until 1948.

The award was first established in 2004.

Award Rules:

1. The Professor Sir Kerr Grant Award is an annual award of a framed Certificate of Appreciation as solely determined by the South Australia Chapter President, and awarded to a member of the Society during the financial year 1 July in one year to 30 June of the following year, for outstanding service to the Society over any period of time.
2. At his /her discretion, the Chapter President may consult in confidence with other Society members before determining this award.
3. Individual members of the Chapter Management Committee may privately suggest names of suitable persons for this Award to the Chapter President for his /her consideration.
4. The presentation of the Professor Sir Kerr Grant Award would normally be made at the Annual Chapter Meeting or alternatively at the Anniversary Birthday function of the South Australia Chapter, but may be made at any other suitable occasion as determined by the Chapter President.
5. If in the Chapter President's opinion there is no suitable person to receive the award, a decision may be made to not make an award in that particular financial year.
6. These rules may be changed only with the approval of the representative of the Kerr Grant family. Adequate reasons, as determined by the Chapter Management Committee, shall have been presented by the Chapter President, and accepted by the Chapter Management Committee and the representative of the Kerr Grant family, for use in the following financial year.

Recipients:

2005: Paula Furlani

First recipient. For 25 years of dedicated service.

DEANE LE CORNU & JOHN D SMITH AWARD:

Lighting course lectures were first delivered in South Australia in 1954 by the late Stuart Lay and the late W.A (Bill) Nicholls, but in the early 1960's John D Smith developed and taught an IES (subsequently National Council approved) lighting syllabus at Kilkenny Technical College for a first year lighting course, and in 1963 produced a second year lighting syllabus and teaching course. After John D Smith eventually moved to teach at the SA Institute of Technology (SAIT) Louis Laybourne-Smith School of Architecture, Deane Le Cornu took over. Deane Le Cornu developed the course still further after the course had moved to Regency College of TAFE. The SA IES Regional Society, always conscious of its responsibilities to lighting education in South Australia, established an annual Illumination Award of a book prize to the top lighting

Awards Other Than Lighting

course student as determined by the lighting course lecturers. In the early part of the twenty-first century the SA IES, now as a Chapter of the IESANZ, decided in 2004 to honour these two lighting education lecturers by naming this award after them.

Award Rules:

1. This award is made annually to the top student in the Regency College of TAFE lighting course as determined by the lighting course lecturers.
2. The award consists of a book prize, as requested by the award-winning student, to a value not less than \$100 as determined by the CMC, and a certificate honouring these two past lighting course education lecturers.
3. The award is presented, either by the Chapter President at a suitable occasion such as a Chapter Annual Birthday Dinner, or as a voucher at a Regency TAFE function as agreed with the TAFE College administration.

VICTORIA CHAPTER AWARDS

S J SALMON MEDAL AWARD:

S J Salmon was a founder member of the Victoria IES and Chairman of its inaugural meeting in 1931. He was very active in the Society's affairs, particularly in the early years. He joined Lawrence & Hanson, (Electrical Wholesalers), in Sydney in 1905 and became the first Melbourne Branch Manager in 1906. In 1948 Lawrence & Hanson was incorporated in Victoria with Salmon as Managing Director. He died in 1961.

In 1958, according to Ernest Freedman in his "*The Illuminating Engineering Societies of Australia - National Council - 1946-1976*", the Council of the Society in Victoria decided "as a token of esteem to Mr S. Salmon, first chairman of the Society and to mark his retirement from business, to introduce a perpetual award to be known as "The S J Salmon Award". The award is made to the author adjudged to have given the best technical paper to the Society during a particular year. The award consists of an inscribed medal, presented at the annual general meeting.

The first recipient was the late J C Lowson, and the late Denis C Irving was given the Award on three occasions.

Times have changed and people no longer present written papers but more frequently digitally created slide projected presentations with no written material at all. In addition, it is now rare for anyone to speak on "Illuminating Engineering". Consequently the rules were amended in 1990 to refer to any subject relating to the art and science of lighting.

Award Rules:

1. This annual award is to be made for the best presentation on any subject relating to the art and science of lighting by a member at a monthly meeting of the Victoria Chapter.
2. The Chapter Management Committee shall determine who receives the award, or if no presentation was considered to be of sufficient merit, that no award be made.

KEVIN POULTON AWARD:

Kevin Poulton, M.Sc.Arch, Dip.E.E, MIE.Aust, C.Eng, LFIES, MCIBS, FAIE, FSLL, T.Tn.IC, was born in 1929 and commenced his career as a Registered Electrician and Electrical Draughtsman. From 1961 to 1971 he worked as a lighting consulting engineer at the State Electricity Commission of Victoria. From 1965 to 1996 he was a part-time lecturer in lighting at the Royal Melbourne Institute of Technology (RMIT). In 1997 he became Manager of lighting courses at RMIT and from 1971 to 1975 was Head of Department, Certificate of Technology, Electrical.

From 1975 to 1981 he was Senior Lighting Engineer in the Physical Working Environment Branch of the Department of Productivity in the Commonwealth Government. In 1981 he left the public service and held lighting management positions with Kempthorne Lighting and Spectra Lighting.

Awards Other Than Lighting

In 1983 he established K. Poulton & Associates, a lighting consultancy services company. In 1985 he established Lighting Sciences Australasia, Australia's first fully independent photometric laboratory and research centre.

Kevin joined the IES in 1959, became a Member in 1965 and a Fellow in 1972. In 1998 he was elected a Life Fellow of the Society. He was a member of the Victoria Council for many years and President from 1972 to 1974. He was Chairman of CIE Technical Committees TC 3.4 "Discomfort Glare", TC 3.13 "Evaluation of Discomfort Glare", and member of TC 3.01 "Glare for Small and Large Sources" and TC 3.21 "Guide to Interior Lighting". He was Chairman of Standards Australia LG/1 Interior Lighting Committee, member of the Lighting Industry Advisory Group, RMIT and of the CIE 22nd Session Organising Committee, Melbourne.

He received the Victoria Chapter S.J. Salmon Award on three occasions and the Lamplighter Award. He was awarded a Distinguished Service Certificate for Services to the Australian Lighting Industry, the RMIT Centenary Medallion, a CIE award and an Honorary Life Membership of CIE.

Kevin continues with his lighting consultancy work and frequently acts as an expert witness for Administrative Appeals Tribunal hearings and legal disputations.

He is honoured by having this lighting award named after him.

Award Rules:

3. This award is given to the best student in the first year of the IES lighting course at the Royal Melbourne University of Technology (RMIT University).
4. The student is chosen by course lecturers. [In year 2008 there were two first year classes and three teachers involved: Ian Johnson, Trevor Stork and Murray Taylor]

PERCY MAGNUS AWARD:

Percy Magnus was a founder member of the Victoria Society. He was born in 1898 and died in 1990, aged 92. He was made Fellow of the Society in 1939. He was the proprietor of Austral Lighting Supplies, located in Swanston Street in the city of Melbourne until 1971 when his company moved to Queensberry Street, North Melbourne. This award was inaugurated in 1978 at the time of his retirement.

Award Rules:

1. This award is given to the best student in the second year of the IES lighting course at the Royal Melbourne University of Technology (RMIT University).
2. The student is chosen by course lecturers.

[In year 2007 these were Ian Johnson and Trevor Stork.]

DR ALBERT DRESLER MEMORIAL LECTURE:

The minutes of the eighteenth annual meeting of the National Council of the Illuminating Engineering Societies of Australia held in Adelaide on 12th, 14th and 15th November 1963 records some of the reactions and actions of the Society to the death of Dr Albert Dresler in July 1963. The high standing in which the memory of Dr Albert Dresler was held in both Australia and UK is recorded. One year later, in the minutes of the nineteenth annual meeting of

Awards Other Than Lighting

the National Council of the Illuminating Engineering Societies of Australia held in Perth, Western Australia, on 10 November 1964, it was recorded that:

"The meeting considered it would be most desirable to honour the memory of the late Dr. A Dresler in a suitable and permanent form. Mr. Hardy (Victoria) indicated that the Victoria Society had obtained a note from Mrs. Dresler in which she expressed her appreciation for any action the Society decided to take to perpetuate the memory of Dr. Dresler. Some ideas which were considered were - a medal to be awarded to the outstanding student of the year; an award on an international basis for outstanding lighting research, development, or education; an award restricted to Australia for outstanding lighting research, development or education; and a memorial lecture at the National Convention."

"The meeting decided in favour of a memorial lecture of a very high standard. So that the standard would be maintained at a high level it was agreed that it would be desirable not to hold the lecture every year - wherever possible the subject and the speaker of the memorial lecture should be decided upon some twelve months before its delivery. The meeting felt that holding a memorial lecture every five years when the National Convention was being held in Melbourne, Dr Dresler's home state, would be most appropriate. It was decided that the selection of a person to deliver the memorial lecture should be referred to National Council executive and that if a State Society, other than Victoria, could obtain a suitable speaker for a memorial lecture at a National Convention held in its own State, it should feel free to refer the name to National Council for consideration. The meeting felt that as the standard of the memorial lecture should be kept very high, if a suitable speaker could not be obtained on any occasion it would be preferable not to hold the memorial lecture at that time."

It was then resolved: "That National Council honours the memory of the late Dr. Albert Dresler by the establishment of the "Albert Dresler Memorial Lecture".

Award Rules:

1. The "Albert Dresler Memorial Lecture" shall be delivered at the Society Convention in Melbourne and at such other Conventions as the IESANZ Board may decide.
2. The Lecture shall be delivered by invitation and preferably be an original technical paper.
3. The name of the proposed speaker shall be submitted by the Victoria Chapter to IESANZ Board for their approval not later than at least three months prior to the date of the lecture.
4. The paper shall be published.

Note: In 1964 the first "Albert Dresler Memorial Lecture" was delivered at the IES Convention held in Perth, Western Australia, to be followed by others at irregular intervals through to the last IES Convention held in Melbourne in 2003. Eleven Memorial Lectures have so far been delivered up to year 2007.

DR ALBERT DRESLER DAYLIGHT EXCELLENCE AWARD:

First established in 2012, this award celebrates the use of daylight design in architecture, and is open to projects completed in the Victoria and Tasmania in the previous two (2) years.

Membership of the IES is not a requirement.

Awards Other Than Lighting

Projects of all sizes are invited to enter, from the smallest renovations to the largest infrastructure projects.

Projects will be judged on following criteria:

1. Research and analysis of daylight in the design process
2. Environmental performance of the daylight design strategy
3. Human Comfort
4. Experiential Outcome

Entry forms, Conditions of Entry and Assessment Criteria can be downloaded from the [Victoria/Tasmanian Chapter web site](#).

For general enquiries, please email the Award Convenor:
vicdaylight@iesanz.org

In 2012 the Dr Albert Dresler Daylight Excellence Award Winner was the National Centre for Synchrotron Science by Bates Smart.

OTHER HONOURED PAST MEMBERS:

R J NOTT:

R.J. Nott is honoured by giving his name to a library. The **R J Nott Collection** is a collection of books and periodicals on lighting and related subjects.

[NOTE: The R J Nott Collection is presently removed from the Victoria University and has been placed in temporary storage. It is currently unavailable for member's access.]

It was housed at the Footscray Campus of Victoria University of Technology on behalf of the Illuminating Society of Australia and New Zealand. Members of the Society may borrow items in the collection.

Books may be borrowed and copies of periodical articles obtained through any library on inter-library loan using the Australian Interlending Code. The requesting library may be an academic library (university, college of advanced education or TAFE), a public or municipal library with inter-library loan facilities, or the Society's head office or branch offices.

Items may be requested for loan from anywhere in Australia or New Zealand, but they are only available to Society members, and to bona fide students undertaking research in lighting courses accredited by RMIT and similar institutions.

The loan request must come through the proper inter-library loan channels ie, a library which adheres to the Code, or it must come through the Society's head office or branches.

When making a request, evidence of membership of the Society is required. An explanation should be given to the borrowing library that membership of the Society is a condition of loan, and the librarian asked to record membership details with the inter-library loan request. If there is no evidence of membership then Victoria University cannot lend the item.

Awards Other Than Lighting

Members who wish to borrow in person by coming in to the Library may do so, but once again must supply proof of IESANZ membership.

The University Library will accept inter-library loan vouchers or credits for each item borrowed. These must be supplied by the borrowing library that may pass these costs on to the Society member.

A PDF file catalogue listing of the contents of the R J Nott Collection can be downloaded from the IES web site using PDF program software.

T K JEBB:

According to Ernest Freedman in his "*The Illuminating Engineering Societies of Australia - National Council - 1946-1976*" in November 1964 Professor H P Tuck proposed at the AGM of the Hobart Chapter of the Victoria Society to create a T K Jebb Memorial Prize to commemorate the service rendered by the late T K Jebb to the study of illuminating engineering, with particular reference to encouragement of illuminating engineering in Tasmania, and to encourage students to advance their studies in illuminating engineering.

This was adopted by resolution of the Victoria Council in June 1968. After discussion with the Director of Technical Education in Tasmania it was agreed to award the "TK Jebb Memorial Prize" to the best student in Electrical Engineering I in each centre, the award to be made each year by the Department in cooperation with the Society's Chapters in Hobart and Launceston. Funds totalling \$273.20 from 49 contributors were to purchase a textbook to the value of \$10.00 in each case, and to be provided from income received by investment of the fund principal, supplemented as necessary from Society funds.

WESTERN AUSTRALIA CHAPTER AWARDS

GWENYTH EWENS MEMORIAL LECTURE

Introduction to Memorial Lecture - Gwenyth Alberta Ewens, 1916 - 1995

The following Citation is to be read out by the person introducing the lecturer each time the Memorial Lecture is given in order to remind the audience of who she was and what she has done for the Society.

Gwenyth Ewens was born in 1916 at Claremont, Western Australia, where she attended the Methodist Ladies' College. She studied survey drafting and architecture at the Perth Technical College and took a course in History of Architecture at the University of Western Australia. She became a member of the Architectural Association of Western Australia. She specialised in glass research and did practical work at Pilkington Bros., St Helens, England. After a study tour of The Netherlands and Germany organised by the two respective governments, she became a member of the Housing Centre Trust in London. She was, for 15 years, a member of the Inter-Society Colour Council of USA.

Gwen Ewens was a tireless lecturer on architectural design, interior decoration, lighting, colour and vision; lecturing at the University of Western Australia for the Adult Education Board, and the Technical Education Division of the Department of Education in Western Australia. She presented her first paper 'On the production, properties and utilisation of glass' to the IES in Western Australia in 1949. In 1951, she joined the IES WA Council and served on most of the Council's committees. She acted as secretary when the need arose, contributing her vast experience in Society affairs to the continuity of the IES in Western Australia. She was elected on the National Council in November 1966 and remained on the Council to November 1972, when she retired from the National Council and, in 1975, also from the IES Council in Western Australia because of pressing family commitments.

Gwen was dedicated to the IES and all the Society stands for. She was for many years the Western Australia representative on the National Lighting Education Board, and the State editor of the IES Lighting Review (now "Lighting" magazine). Every five years, Gwen Ewens would become the rallying point for the IES national conferences and conventions in Western Australia. She often acted on the program committee, meetings committee, social committee, facilities committee, publicity committee, and as public relations officer, all in one.

On 20 November 1975 Gwen was elected a Life Fellow of the Illuminating Engineering Societies of Australia in recognition of her work "as a member of the National Council and, in particular, as a long-standing supporter of that Council in her home state, Western Australia".

On behalf of the Society, a small number of members attended Gwen's funeral in Perth on 21 February 1995 to pay their final respects to this fine lady.

In a letter to the IES Western Australia Council 4 years before her death, accompanied by a sum of money, Gwen Ewens wrote "I wish to contribute something to help promote the Society to advance their aims.....I would, also, like to focus some attention with regard to the human element in the lighting field today. This may require the co-operation of allied professions".

Awards Other Than Lighting

On behalf of the Illuminating Engineering Society of Western Australia, it is my great pleasure to remember her wish through the staging of "The Gwenyth Ewens Memorial Lecture" - a dedication to the memory of Gwenyth Ewens, and through her sponsorship of our keynote speaker,
Mr/Ms/Dr.....

NEW ZEALAND CHAPTER AWARDS

IES: THE LIGHTING SOCIETY DUX AWARDS

The New Zealand Chapter, when an independent Society prior to the formation of the IESANZ, instituted the Dux Awards to be granted to the students achieving the highest marks in each year of the 2 years of the IES approved Grad Cert Science and Technology (Lighting) course at the Auckland University of Technology. This course was discontinued at AUT in 2007, and arrangements made for the Lighting course to be taken up at Massey University with the awards again to be made in 2009.

The Chapter Executive Committee shall be advised of the recipient's identity and the Chapter President then formally invites, with the compliments of the Society, the recipient and partner to attend the presentation function, where the recipient will be publicly acknowledged and presented with a certificate prepared by the Society. It has been customary to invite the Principal Lecturer at the Institute to present this certificate on behalf of the Society.

Award Rules:

1. The awards are to be made to the students with the best performance in the IES accredited Lighting and Illumination Course at Massey University.
2. Awards are to be made at each level attained, ie at each of the levels meeting the academic requirements for Technician member status of the IESANZ, and for Member status of the IESANZ
3. The recipient of the award shall be selected by the incumbent Principal Lecturer of the Lighting Course.
4. The award consists of a framed certificate of achievement from the Chapter presented at a New Zealand Chapter meeting.

UPDATES TO THIS DOCUMENT

This document records the background and Rules of the various IES Awards and Memorials Other than Lighting, as at time of publication.

Any changes that need to be made to this documentation should be advised to the IESANZ Company Secretary for onward transmission to the members of the Constitution and Bylaws Committee.
